

Data Flow Diagram - OptiCrop

Date: 08 July 2026
Project: OptiCrop – Smart Agricultural Production Optimization Engine

DFD Description

External Entity	Process	Data Store	Data Flow
Farmer	1. Input Soil & Weather Data	Soil Database	NPK, pH, Temperature, Humidity
Weather API	2. Analyze Data	Weather Database	Weather Forecast
	3. Generate Crop Recommendation	Crop Recommendation DB	Recommended Crop
Farmer	4. Display Result		Recommended Crop, Fertilizer Advice

Flow: Farmer → Input Soil Data → AI Analysis → Crop Recommendation Database → Recommendation Display → Farmer
